 - (b) Development of Moral Instruction and Training in High Schools since 1911
2. Moral Conditions in High Schools.

October 19th, 1915

Rev. A. J. Wm. Myers,
10 Glen Road,

Toronto.

Dear Dr. Myers:

It seems to me that if the chair of Religious Education were to be established by the joint action of the Theological Colleges of Toronto it should be inaugurated within Toronto. Our R. E. A deals with the whole Dominion and I do not think that we ought to inaugurate what would really be a local affair for the city colleges. The scheme, however, is a good one, and I think it should be taken up with Dr. Fraser and Mr. Robertson along with the others whom you mention. Would it not be well to speak to Robertson about the matter? I assume that the difficulty now in Knox College is that they have such a financial burden that they will find it hard to add to that burden at present. I shall be glad to speak to Principal Gandier about the matter some time soon.

Yours sincerely,

President.

December 2nd, 1915

Dr. A. J. Wm. Myers,

10 Glen Road,

Toronto.

Dear Dr. Myers:

I have spoken to Principal Gandier on the subject of your letter, with regard to the possibility of establishing an interdenominational chair of Religious Education. He suggested that the matter might be taken up by the colleges and I rather think that he himself may take the initiative. It is really a matter that should be discussed and settled by the colleges themselves. We as a Society have not funds to establish such a position for the joint service of the colleges nor if we did so could it be confined to Toronto, but he himself suggested that by using the intercollegiate, and even university advantages it might be possible with a little additional expense on the part of the colleges to provide a very good department in this subject. To my mind it seems quite feasible. I hope that he himself may take some action in the matter.

With kind regards, I am,

Yours sincerely,

President.
